FOREWORD

Section 59 of the Civil Aviation Act of Bhutan 2016 empowers the Head of Authority, in this case the Director General of Civil Aviation Authority of Bhutan (BCAA), to make Rules and Regulations concerning the use of the airspace, air navigation facilities and services. Accordingly, BCAR - 12 (Search and Rescue) containing provision incorporating the standard and recommended practices of ICAO Annex 12 has been developed.

BCAR - 12 or BCAR – Search and Rescue, which are to be used interchangeably and construed to refer to this document, is hereby published in accordance with Section 56 of the Act.

During the transposing of the standard and recommended practices of ICAO Annex 12 to this BCAR, some provisions that are not applicable or currently irrelevant have been left out and marked as “Reserved”. These provisions will be incorporated as and when appropriate.

Any difference existing in this BCAR and the related ICAO Standards and Recommended Practices and any amendments thereto will be notified to the ICAO and the same shall be published in the Aeronautical Information Publication (AIP).

BCAR - 12 hereby supersedes the BCAR - Search and Rescue that was published on October 1, 2010.

This BCAR is a controlled document and the provisions contained herein are subject to change through amendments.

Wangdi Gyaltsen
Director General
Bhutan Civil Aviation Authority

Date: 07/12/2017

	Search and Rescue	BCAR - 12	
	Definitions	Chapter: 1	Page: 1-1

1 CHAPTER 1. DEFINITIONS

1.2 Definitions

When the following terms are used in this document they have the following meanings:

Alerting post. Any facility intended to serve as an intermediary between a person reporting an emergency and a rescue coordination centre or rescue sub centre.

Alert phase. A situation wherein apprehension exists as to the safety of an aircraft and its occupants.

Distress phase. A situation wherein there is a reasonable certainty that an aircraft and its occupants are threatened by grave and imminent danger and require immediate assistance.

Ditching: The forced landing of an aircraft on water.

Emergency phase. A generic term meaning, as the case may be, uncertainty phase, alert phase or distress phase.

Joint rescue coordination centre (JRCC). A rescue coordination centre responsible for both aeronautical and maritime search and rescue operations.

Operator. A person, organization or enterprise engaged in or offering to engage in an aircraft operation.

Pilot-in-command. The pilot designated by the operator, or in the case of general aviation, the owner, as being in command and charged with the safe conduct of a flight.

Rescue. An operation to retrieve persons in distress, provide for their initial medical or other needs, and deliver them to a place of safety.

Rescue coordination centre (RCC). A unit responsible for promoting efficient organization of search and rescue services and for coordinating the conduct of search and rescue operations within a search and rescue region.

Rescue sub-centre (RSC). A unit subordinate to a rescue coordination centre, established to complement the latter according to particular provisions of the responsible authorities.

Search. An operation normally coordinated by a rescue coordination centre or rescue sub-centre using available personnel and facilities to locate persons in distress.

Search and rescue aircraft. An aircraft provided with specialized equipment suitable for the efficient conduct of search and rescue missions.

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Definitions	Chapter: 1	Page: 1-2

Search and rescue facility. Any mobile resource, including designated search and rescue units, used to conduct search and rescue operations.

Search and rescue service. The performance of distress monitoring, communication, coordination and search and rescue functions, initial medical assistance or medical evacuation, through the use of public and private resources, including cooperating aircraft, vessels and other craft and installations.

Search and rescue region (SRR). An area of defined dimensions, associated with a rescue coordination centre, within which search and rescue services are provided.

Search and rescue unit. A mobile resource composed of trained personnel and provided with equipment suitable for the expeditious conduct of search and rescue operations.

State of Registry. The State on whose register the aircraft is entered.

Uncertainty phase. A situation wherein uncertainty exists as to the safety of an aircraft and its occupants.

	Search and Rescue	BCAR - 12	
	Organization	Chapter: 2	Page: 2-1

2 CHAPTER 2. ORGANIZATION

2.1 Search and rescue services

2.1.1 Bhutan Civil Aviation Authority shall designate a SAR organization, which shall individually or in cooperation with other States, arrange establishment and prompt provision of search and rescue services within Bhutan to ensure that assistance is rendered to persons in distress. Such services shall be provided on a 24-hour basis.

2.1.1.1 (Not applicable)

2.1.1.2 Basic elements of search and rescue services shall include a legal framework, a responsible authority, organized available resources, communication facilities and a workforce skilled in coordination and operational functions.

2.1.1.3 SAR services shall establish processes to improve service provision, including the aspects of planning, domestic and international cooperative arrangements and training.

2.1.2 In providing assistance to aircraft in distress and to survivors of aircraft accidents, the SAR organization shall do so regardless of the nationality or status of such persons or the circumstances in which such persons are found.

2.1.3 The SAR organization having accepted responsibility to provide search and rescue services shall use SAR units and other available facilities to assist any aircraft or its occupants that are or appear to be in a state of emergency.

2.1.4 (Not applicable)

2.1.5 (Not applicable)

2.1.6 (Not applicable)

2.2 Search and rescue regions

2.2.1 The search and rescue region shall coincide with the boundaries of the Bhutan Flight Information Region (FIR) within which the SAR organisation will provide search and rescue services.

2.3 Rescue coordination centers and rescue sub centers

2.3.1 The SAR organization shall establish a rescue coordinating centre and rescue sub centre in each search and rescue region of Bhutan.

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Organization	Chapter: 2	Page: 2-2

2.3.2 (Reserved)

2.3.3 The rescue coordination centre and, as appropriate, rescue sub centre, shall be staffed 24 hours a day by trained personnel.

2.3.4 RCC and RSC personnel involved in the conduct of radiotelephony communications shall be proficient in the use of the English language.

2.3.5 In areas where public telecommunications facilities do not permit persons observing an aircraft in emergency to notify the rescue coordination centre concerned directly and promptly, the SAR organization should designate suitable units of public or private services as alerting posts.

2.4 Search and rescue communications

2.4.1 The rescue coordination centres shall have means of rapid and reliable two-way communication with:

- a) associated air traffic services units;
- b) associated rescue sub centres;
- c) appropriate direction-finding and position-fixing stations;
- d) the headquarters of search and rescue units in the region;
- e) designated meteorological office or meteorological watch office;
- f) search and rescue units;
- g) alerting posts; and
- h) Cospas-Sarsat Mission Control Centre servicing the search and rescue region.

2.4.2 Each RSC, where provided shall have means of rapid and reliable two-way communication with:

- a) adjacent rescue sub centres;
- b) a meteorological office or meteorological watch office;
- c) search and rescue units; and
- d) alerting posts.

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Organization	Chapter: 2	Page: 2-3

2.5 Search and rescue units

2.5.1 The SAR organization shall designate as search and rescue units elements of public or private services suitably located and equipped for the search and rescue operations.

Note.— The minimum units and facilities necessary for provision of search and rescue operations within a search and rescue region are determined by regional air navigation agreements and are specified in the appropriate Air Navigation Plan and Facilities and Services Implementation Document publications.

2.5.2 The SAR organization shall designate as parts of the search and rescue plan of operation, elements of public or private services that do not qualify as search and rescue units but are nevertheless able to participate in search and rescue operations.

2.6 Search and rescue equipment

2.6.1 Search and rescue units shall be provided with equipment for locating promptly, and for providing adequate assistance at the scene of an accident.

2.6.2 Each search and rescue unit shall have means of rapid and reliable two-way communication with other search and rescue facilities engaged in the same operation.

2.6.3 Each search and rescue aircraft shall be equipped to be able to communicate on the aeronautical distress and on scene frequencies and on such other frequencies as may be prescribed.

2.6.4 Each search and rescue aircraft shall be equipped with a device for homing on distress frequencies.

Note 1.— Emergency locator transmitter (ELT) carriage requirements are given in BCAR - 6, Parts I, II and III.

Note 2.— Specifications for ELTs are given in BCAR - 10, Volume III.

2.6.5 (Not applicable)

2.6.6 (Not applicable)

2.6.7 Unless it is known that there is no need to provide supplies to survivors by air, at least one of the aircraft participating in a search and rescue operation shall carry droppable survival equipment.

2.6.8 The SAR organization should locate, at appropriate aerodromes, the survival equipment suitably packed for dropping by aircraft.

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Cooperation	Chapter: 3	Page: 3-1

3 CHAPTER 3. COOPERATION

3.1 Cooperation between states

3.1.1 The BCAA shall coordinate the SAR organization with those of neighbouring States.

3.1.2 The SAR organization shall, whenever necessary, coordinate its SAR operations with those of neighbouring States especially when these operations are proximate to adjacent search and rescue regions.

3.1.2.1 The SAR organization shall, in so far as practicable, develops common search and rescue plans and procedures to facilitate coordination of search and rescue operations with those of neighbouring States.

3.1.3 Subject to such conditions as may be prescribed by the BCAA, the SAR organization shall permit immediate entry of search and rescue units of other States into the territory of Bhutan for the purpose of searching for the site of aircraft accidents and rescuing survivors of such accidents.

3.1.4 SAR units entering the territory of neighbouring States for search and rescue purposes shall transmit a request, giving full details of the projected mission and the need for it, to the rescue coordination centre of the neighbouring State concerned or to such other authority as had been designated by the State.

3.1.4.1 When a request is received from the authorities of another Contracting State, who wish their search and rescue units to enter the territory of Bhutan, the SAR organization shall:

- immediately acknowledge the receipt of such a request, and
- indicate the conditions, if any, as soon as possible under which the projected mission may be undertaken.

3.1.5 The BCAA shall enter into agreements with neighbouring States to strengthen search and rescue cooperation and coordination, setting forth the conditions for entry of each other's search and rescue units into its respective territories.

3.1.6 The rescue coordination centre shall:

- a) request from other RCC's such assistance, including aircraft, vessels, persons or equipment, as may be needed;
- b) grant any necessary permission for the entry of such aircraft, vessels, persons or equipment into the territory of Bhutan subject to the conditions prescribed by the Director General of Civil Aviation; and
- c) make the necessary arrangements with the appropriate customs, immigration or other authorities with a view to expediting such entry.

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Cooperation	Chapter: 3	Page: 3-2

3.1.7 The SAR organization shall provide, when requested, assistance to other rescue coordination centres, including assistance in the form of aircraft, persons or equipment.

3.1.8 The SAR organization shall make arrangements for joint training exercises involving their search and rescue units, those of other States and operators, in order to promote search and rescue efficiency.

3.1.9 The SAR organization should make necessary arrangements for periodic liaison visits by personnel of its RCC and RSC to the centres of neighbouring States.

3.2 Cooperation with other services

3.2.1 The BCAA shall arrange for all aircraft, and local services and facilities which do not form part of the search and rescue organization to cooperate fully with the latter in search and rescue and to extend any possible assistance to the survivors of aircraft accidents.

3.2.2 (Not applicable)

3.2.3 The SAR organization shall cooperate with those responsible for investigating accidents and with those responsible for the care of those who suffered from the accident.

3.2.4 To facilitate accident investigation, rescue units should, when practicable, be accompanied by persons qualified in the conduct of aircraft accident investigations.

3.2.5 The SAR organization shall designate a search and rescue point of contact for the receipt of Cospas-Sarsat distress data.

3.3 Dissemination of information

3.3.1 The SAR organization shall publish and disseminate all information necessary for the entry of search and rescue units of other States into its territory or, alternatively, include this information in search and rescue service arrangements.

3.3.2 When such information could benefit the provision of search and rescue services, the SAR organizations should make available, through the RCC's or other agencies, information regarding their search and rescue plans of operation.

3.3.3 The SAR organization should, to the extent desirable and practicable, disseminate information to the general public and emergency response authorities regarding actions to be taken when there is reason to believe that an aircraft's emergency situation may become cause for public concern or require a general emergency response.

	Search and Rescue	BCAR - 12	
	Preparatory Measures	Chapter: 4	Page: 4-1

4 CHAPTER 4. PREPARATORY MEASURES

4.1 Preparatory information

4.1.1 Each RCC and RSC shall have readily available at all times up-to-date information concerning the following in respect of its search and rescue region:

- a) search and rescue units, and alerting posts;
- b) air traffic services units;
- c) means of communication that may be used in search and rescue operations;
- d) addresses and telephone numbers of all operators, or their designated representatives, engaged in operations in the region; and
- e) any other public and private resources including medical and transportation facilities that are likely to be useful in search and rescue.

4.1.2 Each RCC and RSC should have readily available all other information of interest to search and rescue, including information regarding:

- a) the locations, call signs, hours of watch, and frequencies of all radio stations likely to be employed in support of search and rescue operations;
- b) the locations and hours of watch of services keeping radio watch, and the frequencies guarded;
- c) locations where supplies of droppable emergency and survival equipment are stored; and
- d) objects which it is known might be mistaken for unlocated or unreported wreckage, particularly if viewed from the air.

4.1.3 (Not applicable)

4.1.4 (Not applicable)

4.2 Plans of operation

4.2.1 RCC and/ or RSC shall prepare detailed plans of operation for the conduct of search and rescue operations within its search and rescue region.

4.2.2 SAR plans of operations shall be developed jointly with representatives of the operators and other public and private agencies that may assist in providing search and rescue services or

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Preparatory Measures	Chapter: 4	Page: 4-2

benefit from them, taking into account that the number of survivors could be large.

4.2.3 The plans of operation shall specify arrangements for the servicing and refuelling, to the extent possible, of aircraft and vehicles employed in search and rescue operations, including those made available by other States.

4.2.4 The SAR plans of operation shall contain details regarding actions to be taken by those persons engaged in search and rescue, including:

- a) the manner in which search and rescue operations are to be conducted in the search and rescue region;
- b) the use of available communication systems and facilities;
- c) the actions to be taken jointly with other rescue coordination centres;
- d) the methods of alerting en-route aircraft;
- e) the duties and prerogatives of persons assigned to search and rescue;
- f) the possible redeployment of equipment that may be necessitated by meteorological or other conditions;
- g) the methods for obtaining essential information relevant to search and rescue operations, such as weather reports and forecasts, appropriate NOTAM, etc.;
- h) the methods for obtaining, from other rescue coordination centres, such assistance, including aircraft, vessels, persons or equipment, as may be needed;
- i) the methods for assisting search and rescue or other aircraft to proceed to aircraft in distress; and
- j) cooperative actions to be taken in conjunction with air traffic services units and other authorities concerned to assist aircraft known or believed to be subject to unlawful interference.

4.2.5 SAR plans of operation should be integrated with airport emergency plans to provide for rescue services in the vicinity of aerodromes.

4.3 Search and rescue units

4.3.1 Each search and rescue unit shall:

- a) be cognizant of all parts of the plans of operation prescribed in 4.2 that are necessary for the effective conduct of its duties; and

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Preparatory Measures	Chapter: 4	Page: 4-3

- b) keep the rescue coordination centre informed of its preparedness.

4.3.2 The SAR organization shall:

- a) maintain in readiness the required number of search and rescue facilities; and
- b) maintain adequate supplies of rations, medical stores, signalling devices and other survival and rescue equipment.

4.4 Training and exercises

To achieve and maintain maximum efficiency in search and rescue, the SAR organization shall provide for regular training of their search and rescue personnel and arrange appropriate search and rescue exercises.

4.5 Wreckage

The SAR organization shall ensure that wreckage resulting from aircraft accidents within the territory of Bhutan or, in the case of accidents in the areas of undetermined sovereignty, within the search and rescue regions for which it is responsible, is removed, obliterated or charted following completion of the accident investigation, if its presence might constitute a hazard or confuse subsequent search and rescue operations

	Search and Rescue	BCAR - 12	
	Operating Procedures	Chapter: 5	Page: 5-1

5 CHAPTER 5. OPERATING PROCEDURES

5.1 Information concerning emergencies

5.1.1 Any authority or any element of the search and rescue organization having reason to believe that an aircraft is in an emergency shall give immediately all available information to the RCC concerned.

5.1.2 RCC shall, immediately upon receipt of information concerning aircraft in emergency, evaluate such information and assess the extent of the operation required.

5.1.3 When information concerning aircraft in emergency is received from other sources than air traffic services units, the rescue coordination centre shall determine to which emergency phase the situation corresponds and shall apply the procedures applicable to that phase.

5.2 Procedures for rescue coordination centres during emergency phases

5.2.1 Uncertainty phase

Upon the occurrence of an uncertainty phase, the rescue coordination centre shall cooperate to the utmost with air traffic services units and other appropriate agencies and services in order that incoming reports may be speedily evaluated.

5.2.2 Alert phase

Upon the occurrence of an alert phase the rescue coordination centre shall immediately alert SAR units and initiate any necessary action.

5.2.3 Distress phase

Upon the occurrence of a distress phase, the rescue coordination centre shall:

- a) immediately initiate action by search and rescue units in accordance with the appropriate plan of operation;
- b) ascertain the position of the aircraft, estimate the degree of uncertainty of this position, and, on the basis of this information and the circumstances, determine the extent of the area to be searched;
- c) notify the operator, where possible, and keep the operator informed of developments;
- d) notify other rescue coordination centres, the help of which seems likely to be required, or which may be concerned in the operation;

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Operating Procedures	Chapter: 5	Page: 5-2

- e) notify the associated air traffic services unit, when the information on the emergency has been received from another source;
- f) request at an early stage such aircraft, helicopter and other services not specifically included in the appropriate plan of operation and able to assist to:
 - 1) maintain a listening watch for transmissions from the aircraft in distress, survival radio equipment or an ELT;

Note.- The frequencies contained in the specifications for ELTs given in BCAR - 10, volume III, 121.5 MHz and 406 MHz.

 - 2) assist the aircraft in distress as far as practicable; and
 - 3) inform the rescue coordination centre of any developments;
- g) from the information available, draw up a detailed plan of action for the conduct of the search and/or rescue operation required and communicate such plan for the guidance of the authorities immediately directing the conduct of such an operation;
- h) amend as necessary, in the light of evolving circumstances, the detailed plan of action;
- i) notify the appropriate accident investigation authorities; and
- j) notify the State of Registry of the aircraft.

The order in which these actions are described shall be followed unless circumstances dictate otherwise.

5.2.4 Initiation of search and rescue action in respect of an aircraft whose position is unknown

In the event that an emergency phase is declared in respect of an aircraft whose position is unknown and may be in one of two or more search and rescue regions, the following shall apply:

- a) When a RCC is notified of the existence of an emergency phase and is unaware of other centres taking appropriate action, it shall assume responsibility for initiating suitable action in accordance with 5.2 and confer with neighbouring rescue coordination centres with the objective of designating one rescue coordination centre to assume responsibility forthwith.
- b) Unless otherwise decided by common agreement of the rescue coordination centres concerned, the rescue coordination centre to coordinate search and rescue action shall be the centre responsible for:
 - the region in which the aircraft last reported its position; or
 - the region to which the aircraft was proceeding when its last reported position was on

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Operating Procedures	Chapter: 5	Page: 5-3

the line separating two search and rescue regions; or

- the region to which the aircraft was destined when it was not equipped with suitable two-way radio communication or not under obligation to maintain radio communication; or
 - the region in which the distress site is located as identified by the Cospas-Sarsat system.
- c) After declaration of the distress phase, the RCC with overall coordination responsibility shall inform all RCC that may become involved in the operation of all the circumstances of the emergency and subsequent developments. Likewise, all RCC becoming aware of any information pertaining to the emergency shall inform the RCC that has overall responsibility.

5.2.5 Passing of information to aircraft in respect of which an emergency phase has been declared

Whenever applicable, the RCC responsible for search and rescue action shall forward to the air traffic services unit serving the flight information region in which the aircraft is operating, information of the search and rescue action initiated, in order that such information can be passed to the aircraft.

5.3 Procedures where responsibility for operations extends to two or more Contracting States

Where the conduct of operations over the entire search and rescue region is the responsibility of more than one Contracting State, each involved State shall take action in accordance with the relevant plan of operations when so requested by the RCC of the region.

5.4 Procedures for authorities in the field

The authorities immediately directing the conduct of operations or any part thereof shall:

- a) give instructions to the units under their direction and inform the RCC of such instructions; and
- b) keep the RCC informed of developments.

5.5 Procedures for rescue coordination centre –termination and suspension of operations

5.5.1 Search and rescue operations shall continue, when practicable, until all survivors are delivered to a place of safety or until all reasonable hope of rescuing survivors has passed.

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Operating Procedures	Chapter: 5	Page: 5-4

5.5.2 The responsible RCC shall normally be responsible for determining when to discontinue search and rescue operations.

Note – Responsible RCC may require input from other participating agencies involved in the SAR operation in the decision-making process leading to termination of SAR operations.

5.5.3 When a search and rescue operation has been successful or when a rescue coordination centre considers, or is informed, that an emergency no longer exists, the emergency phase shall be cancelled, the search and rescue operation shall be terminated and any authority, facility or service that has been activated or notified shall be promptly informed.

5.5.4 If a search and rescue operation becomes impracticable and the RCC concludes that there might still be survivors, the centre shall temporarily suspend on-scene activities pending further developments and shall promptly inform any authority, facility or service which has been activated or notified. Relevant information subsequently received shall be evaluated and search and rescue operations resumed when justified and practicable.

5.6 Procedures at the scene of an accident

5.6.1 When multiple facilities are engaged in search and rescue operations on-scene, the RCC and RSC shall designate one or more units on-scene to coordinate all actions to help ensure the safety and effectiveness of air and surface operations, taking into account facility capabilities and operational requirements.

5.6.2 When a pilot-in-command observes that either another aircraft or a surface craft is in distress, the pilot shall, if possible and unless considered unreasonable or unnecessary:

- a) keep the craft in distress in sight until compelled to leave the scene or advised by the rescue coordination centre that it is no longer necessary;
- b) determine the position the craft in distress;
- c) as appropriate, report to the RCC or air traffic services unit as much of the following information as possible:
 - type of craft in distress, its identification and condition;
 - its position, expressed in geographical or grid coordinates or in distance and true bearing from a distinctive landmark or from a radio navigation aid;
 - time of observation expressed in hours and minutes Coordinated Universal Time (UTC);
 - number of persons observed;
 - whether persons have been seen to abandon the craft in distress;

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Operating Procedures	Chapter: 5	Page: 5-5

- on-scene weather conditions;
- apparent physical condition of survivors;
- apparent best ground access route to the distress site; and

d) act as instructed by the RCC or the air traffic services unit.

5.6.2.1 If the first aircraft to reach the scene of an accident is not a SAR aircraft, it shall take charge of on-scene activities of all other aircraft subsequently arriving until the first SAR aircraft reaches the scene of the accident. If, in the meantime, such aircraft is unable to establish communication with the appropriate RCC or air traffic services unit, it shall, by mutual agreement, hand over to an aircraft capable of establishing and maintaining such communications until the arrival of the first SAR aircraft.

5.6.3 When it is necessary for an aircraft to convey information to survivors or surface rescue units, and two-way communication is not available, it shall, if practicable, drop communication equipment that would enable direct contact to be established, or convey the information by dropping a hard copy message.

5.6.4 When a ground signal has been displayed, the aircraft shall indicate whether the signal has been understood or not by the means described in 5.6.3 or, if this is not practicable, by making the appropriate visual signal.

5.6.5 When it is necessary for an aircraft to direct a surface craft to the place where an aircraft or surface craft is in distress, the aircraft shall do so by transmitting precise instructions by any means at its disposal. If no radio communication can be established, the aircraft shall make the appropriate visual signal.

Note – Air-to-surface and surface-to-air visual signals are published in Volume III of ICAO Doc 9731.

5.7 Procedures for a pilot-in-command intercepting a distress transmission

Whenever a distress transmission is intercepted by a pilot-in-command of an aircraft, the pilot shall, if feasible:

- a) acknowledge the distress transmission;
- b) record the position of the craft in distress if given;
- c) take a bearing on the transmission;
- d) inform the appropriate rescue coordination centre or air traffic services unit of the distress transmission, giving all available information; and

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Operating Procedures	Chapter: 5	Page: 5-6

- e) at the pilot's discretion, while awaiting instructions, proceed to the position given in the transmission.

5.8 Search and rescue signals

5.8.1 The air-to-surface and surface-to-air visual signals in the Appendix shall, when used, have the meaning indicated therein. They shall be used only for the purpose indicated and no other signals likely to be confused with them shall be used.

5.8.2 Upon observing any of the signals in the Appendix, aircraft shall take such action as may be required by the interpretation of the signal given in the Appendix.

5.9 Maintenance of records

5.9.1 RCC shall keep a record of the operational efficiency of SAR organization in its region.

5.9.2 Each RCC should prepare appraisals of actual search and rescue operations in its region. These appraisals should comprise any pertinent remarks on the procedures used and on the emergency and survival equipment, and any suggestions for improvement of those procedures and equipment. Those appraisals which are likely to be of interest to other States should be submitted to ICAO for information and dissemination as appropriate.

APPENDIX. SEARCH AND RESCUE SIGNALS

(Note.- See Chapter 5, 5.8 of this document)

1. Signals with surface craft

1.1 The following manoeuvres performed in sequence by an aircraft mean that the aircraft wishes to direct a surface craft towards an aircraft or a surface craft in distress:

- a) circling the surface craft at least once;
- b) crossing the projected course of the surface craft close ahead at low altitude and:
 - 1) rocking the wings; or
 - 2) opening and closing the throttle; or
 - 3) changing the propeller pitch.

Note. — Due to high noise level on board surface craft, the sound signals in 2) and 3) may be less effective than the visual signal in 1) and are regarded as alternative means of attracting attention.

- c) heading in the direction in which the surface craft is to be directed. Repetition of such manoeuvres has the same meaning.

1.2 The following manoeuvres by an aircraft means that the assistance of the surface craft to which the signal is directed is no longer required:

- crossing the wake of the surface craft close astern at a low altitude and:
 - 1) rocking the wings; or
 - 2) opening and closing the throttle; or
 - 3) changing the propeller pitch.

Note. — The following replies may be made by surface craft to the signal in 1.1:

— *For acknowledging receipt of signals:*

- 1) *The hoisting of the “code pennant” (vertical red and white stripes) close up (meaning understood);*
- 2) *The flashing of a succession of “T’s” by signal lamp in the Morse code;*

Second Edition	Revision 00	Bhutan Civil Aviation Authority	Dec 2017
----------------	-------------	---------------------------------	----------

	Search and Rescue	BCAR - 12	
	Search and Rescue Signals	Appendix	Page: APP - 2

3) *The changing of heading to follow the aircraft.*

— *For indicating inability to comply:*

1) *the hoisting of the international flag “N” (a blue and white checkered square);*

2) *the flashing of a succession of “N’s” in the Morse code.*

Note. — See Note following 1.1 b), 3).

2. Ground-air visual signal code

2.1 Ground-air visual signal code for use by survivors

<i>No.</i>	<i>Message</i>	<i>Code symbol</i>
1	Require assistance	∨
2	Require medical assistance	×
3	No or Negative	N
4	Yes or Affirmative	Y
5	Proceeding in this direction	↑

2.2 Ground-air visual signal code for use by rescue units

<i>No.</i>	<i>Message</i>	<i>Code symbol</i>
1	Operation completed	LLL
2	We have found all personnel	<u>LL</u>
3	We have found only some personnel	++
4	We are not able to continue. Returning to base	XX
5	Have divided into two groups. Each proceedings in direction indicated	
6	Information received that aircraft is in this direction	→ →
7	Nothing found. Will continue to search.	NN

2.3 Symbols shall be at least 2.5 metres (8 feet) long and shall be made as conspicuous as possible.

Note 1. — Symbols may be formed by any means such as: strips of fabric, parachute material, pieces of wood, stones or such like material; marking the surface by tramping, or staining with oil.

Note 2. — Attention to the above signals may be attracted by other means such as radio, flares, smoke and reflected light.

3. Air-to-ground signals

3.1 The following signals hours by aircraft mean that the ground signals have been understood:

a) during the hours of daylight:

— by rocking the aircraft's wings;

	Search and Rescue	BCAR - 12	
	Search and Rescue Signals	Appendix	Page: APP - 4

b) during the hours of darkness:

- flashing on and off twice the aircraft's landing lights or, if not so equipped, by switching on and off twice its navigation lights.

3.2 Lack of the above signal indicates that the ground signal is not understood.
